SUMMARY

Backend-first developer with full stack experience and a growing portfolio of shipped, production apps. Currently getting into DevOps, containerization, and cloud infrastructure. Actively seeking internships.

PROJECTS

Echo — <https://echo-job.vercel.app/>

Automated job application tracker that reads Gmail to build a full application timeline. Eliminates manual tracking by using **Groq API** to parse emails and extract company, role, and application stage into a clean dashboard.

React, Node.js, Express, MongoDB, Gmail API, Google OAuth

10 users

GitRid — <https://gitrid.vercel.app/>

Bulk delete up to 50 GitHub repositories at once using **GitHub OAuth**. Implements async batched requests to balance GitHub API rate limits against parallel execution.

React, Node.js, TypeScript, Express, MongoDB

3k+ requests, 13 users

Quick QB — <https://quick-qb.pages.dev/>

Community driven platform for sharing academic question banks across 300+ courses. Reduces manual sharing on WhatsApp using **Cloudinary** to store PDFs.

MongoDB, Express, React, Node.js, Cloudinary

71k+ requests

Trackify — <https://trackify.arbasil.me/>

Academic credit and CGPA tracker that **extracts grades** directly from **PDF** documents. Built as an intuitive dashboard through collaboration in a three-member team.

React, Node.js, pdf-parse

1k+ users, 2k+ emails sent

NPM PACKAGES & EXTENSIONS

vizz-init — Express + TypeScript backend scaffold with sensible defaults. *(700+ downloads)*

vizz-router — Lightweight custom implementation of React Router for learning and experimentation.

vizzy-search — Fuzzy search utility using **Levenshtein distance**.

LeetCode CMD+K — Keyboard-first **command palette** for fast Java/C++ snippet insertion into the Monaco editor.

JustResults — Blocks non-essential requests (CSS, images, JS); cut page load time **from 959 ms to 352 ms**.

Leetcode-Fahh — Plays FAHH sound every time you fail a LeetCode test case. Works on both Run and Submit.

EXPERIENCE

Full Stack Developer — Tech Society

Aug 2025

Designed and implemented systems for club signups, event management, and project tracking. Implemented **role-based access control**, admin dashboards, and secure user onboarding process with **email verification**.

Developer — Opportune

Mar 2025

Migrated an existing React application to **Redux**, improving state predictability and fixing complex UI bugs in a codebase originally built by senior developers.

Developer and Maintainer — Alpana Tech

Feb 2025

Worked closely with a senior developer to deliver a polished, animated website for a US client. Focused on motion design, responsiveness, and UX polish using Framer Motion.

SKILLS

HTML, CSS, JavaScript, TypeScript, Go, Python, Java, React, Node.js, Express, Flutter, MongoDB, PostgreSQL, REST APIs, OAuth, Bun, SQL, TailwindCSS, Firebase, Appwrite, Three.js, GSAP, Astro, Docker, Azure, Cloudinary

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

2023–2027

Saveetha Engineering College

CGPA: 8.26
